Description

The **CSI-RACK** series DC / AC Sine wave inverters are designed for a wide range of Industrial applications, including Power Stations, Avionics and Telecommunications.

They provide sinusoidal output waveform and input voltage options from 24 ~ 270VDC.

Their low profile and rugged design is key feature of the product.

Output voltage and frequency is as per table below, but we are also able to design for other outputs

Packaged in an industry standard 2U x 19in Rack assembly with AC output available on front panel GPO and also on rear terminals, providing total flexibility.
